

**Designed, Produced,
And
Delivered in the USA**

Mattress Opening Instructions

Step 1

Remove vacuum packed mattress from box and lay onto any solid or slatted clean flat foundation or surface. Unroll the mattress positioning as you would a normal mattress while still in the plastic.

Carefully cut open the clear plastic bag along the outside edges ensuring to not damage product. Damages caused by sharp cutting tools are not warranted.

Step 2

Step 3

Carefully remove the plastic cover from your mattress.

Watch your KIB Mattress expand and take shape (any wrinkles or light odor are common and will soon dissipate).

Step 4

Step 5

Enjoy your KIB Mattress!

Manufacturer suggest waiting up to 48 hours for the mattress to fully expand prior to use. Ventilation is the primary benefit to letting your mattress sit for this period. Our mattresses are CertiPUR-US certified, therefore the foam utilized may still have a slight order and completely harmless. Room temperature and proper air flow will help expand the mattress to full size in a timely manner.

If for any reason you have questions about your KIB mattress, our friendly customer service team would love to answer them! Or, If you have a warranty issue don't fret, we handle that too! Contact us at <https://support.kingdominabox.com>.
